

**NAME:- MUKUL KUMAR**

**REG NO:- 23MCA1072**

EX:- Using AJAX and PHP fetch firstname and lastname in two textboxes and display the concatenated name in a third textbox.

### **//CODE**

```
<!DOCTYPE html>

<html lang="en">

  <body>

    <form id="nameForm" method="get" action="concat.php">

      <input type="text" name="firstName">

      <input type="text" name="lastName">

      <button type="submit" onclick="display()">

        Submit

      </button>

    </form>

  </body>

  <script>

    function display(){

      let request = new XMLHttpRequest();

      request.open("POST", "concat.php");

    }

  </script>

</html>
```

```
<?php
if((isset($_GET['firstName']))&&(isset($_GET['lastName']))) {
    $firstName=htmlspecialchars($_GET['firstName']);
    $lastName=htmlspecialchars($_GET['lastName']);
    $fullname=$firstName." ".$lastName;
    echo"$fullname";
}
else{
```

```
    echo "NONE";  
  }  
?>
```

OUTPUT:-

Mukul Kumar
